

ENVIRONMENTAL POLICY STATEMENT ISO 14001 | WICRO PLASTICS

At Wicro Plastics, we are aware of our responsibility towards the environment and strive for sustainable and environmentally friendly operations. Our goal is to continuously reduce the environmental impact of our injection molding and assembly processes and to comply with all relevant environmental laws and regulations.

We incorporate principles such as design for assembly and the life cycle approach, from the design phase through production, in collaboration with our customers and suppliers

WICRO PLASTICS AIMS TO:

- Fully comply with relevant environmental laws and regulations and stay informed about any changes
- Continuously implement improvements to reduce energy consumption and/or source energy from sustainable sources
- Continuously implement improvements to reduce waste and ensure correct processing and disposal
- Minimize emissions of harmful substances as much as possible
- Use raw materials as efficiently as possible and prevent material waste
- Utilize recycled and bio-based materials, considering these already in the design phase in cooperation with customers and suppliers
- Create an effective system for awareness and involvement of all employees through clear communication, training, and education
- Continuously improve the environmental management system according to ISO 14001
- Implement a sustainable procurement policy and actively select and develop suppliers who make environmentally conscious choices and maintain ISO 14001 and related certifications

We believe that sustainable business practices contribute to a better future. Therefore, we continue to measure, evaluate, and improve our environmental performance. Wicro Plastics encourages its employees, customers, and suppliers to collaborate towards a cleaner and more sustainable industry.
